SUMMARY

Results-driven **Frontend Developer** with **2+ years of experience** in designing, developing, and optimizing web applications. Proficient in **React.js, JavaScript, HTML, CSS, PHP**, and CMS platforms like **WordPress and TYPO3**. Strong experience in **UI/UX design with Figma, performance optimization**, and **CI/CD automation**. Background in **quality assurance** with expertise in debugging and improving user experience. Fluent in English with basic German proficiency.

PROFESSIONAL EXPERIENCE

Frontend Developer | Cognizant Technology Solutions, Hyderabad, India
July 2022 – July 2024

- Built an e-commerce website using React.js, Vue.js, and PHP, improving the UI speed by 40% through optimized rendering strategies.
- Created a dynamic admin dashboard using React and integrated REST APIs for real-time data visualization.
- Implemented lazy loading and code splitting, reducing page load times by 30%.
- Customized WordPress and TYPO3 themes for multiple clients, ensuring SEO-friendly and mobile-responsive designs.
- Developed a multilingual corporate website for a client in Symfony, leading to a 25% increase in user engagement.
- Optimized a large-scale WordPress website, reducing load time from 5s to 1.8s through caching and image compression.
- Set up GitHub Actions for automated deployment and Jenkins CI/CD pipelines, streamlining the development workflow.
- Integrated Cypress and Jest for automated testing, reducing manual testing time by 50%.
- Designed and built Figma prototypes for an enterprise application, collaborating with designers and product managers.
- Conducted A/B testing to refine landing pages, leading to a 15% improvement in conversion rates.
- Worked closely with international clients to implement feature updates and troubleshoot issues.
- Provided technical consulting to optimize the performance of web applications, reducing bounce rates by 20%.

Web Development Intern / *Cognizant Technology Solutions Pvt Ltd., Hyderabad, India*

Mar 2022 – Jun 2022

- Designed interactive Figma prototypes and conducted user testing, leading to better design decisions.
- Collaborated with senior developers in refining front-end code to meet industry best practices.
- Created a job portal landing page with HTML, CSS, and JavaScript, attracting 5,000+ monthly visitors.
- Implemented dark mode toggle functionality, improving accessibility for low-vision users.

EDUCATION

Bachelor of Technology Electronics Computer Engineering
